Shubham Kumar Bind

CTO (Chief Technology Officer)

Role: Oversees the technical development of CherryChat.ai, ensuring scalable and integration features.

The Problem We're Solving

Untitled - TextEdit

File Edit View Help

The User
Problem

Lack of Clarity & No Peer Support & Delayed Assistance

The Website
Owner's
Problem

Website owners **lack real-time insight**
They often rely on passive feedback channels

Why
Existing
Solutions
Fall Short

Standalone Forums: Users have to leave the website and search for third-party forums
Website-Specific Support: Many websites don't have the resources to build an active user community
Generic AI Assistants: Existing AI tools are often site-specific or fail to provide personalized, real-time, community-driven interactions

Summary of
the Problem

There's a **disconnect between users**, other website visitors, and the website owner
This **leads to frustration, wasted time**, and lost opportunities for engagement and growth

The ICC Champions Trophy, previously named the ICC KnockOut Trophy, is a quadrennial cricket tournament organised by the International Cricket Council (ICC). It is played in ODI format. Inaugurated in 1998, The ICC conceived the idea of the Champions Trophy – a short cricket tournament to raise funds for the development of the game in non-test playing countries. It can be compared to FIFA Confederations Cup in football. It remains as one of those ICC events that had the same format as that of another big cricketing event, like the Cricket World Cup, with the format being One Day International.

CHERRYCHAT POPS UP AS USER CLICKS ON THE CHERRY ICON

Is this page about the latest edition of Champion’s Trophy ?

No, Its just about the trophy, not for this year..... lol hahaha

Where its happening this time ????

Its in Pakistan and Dubai. btw **@CherryChatAI** why is Srilanka not playing???

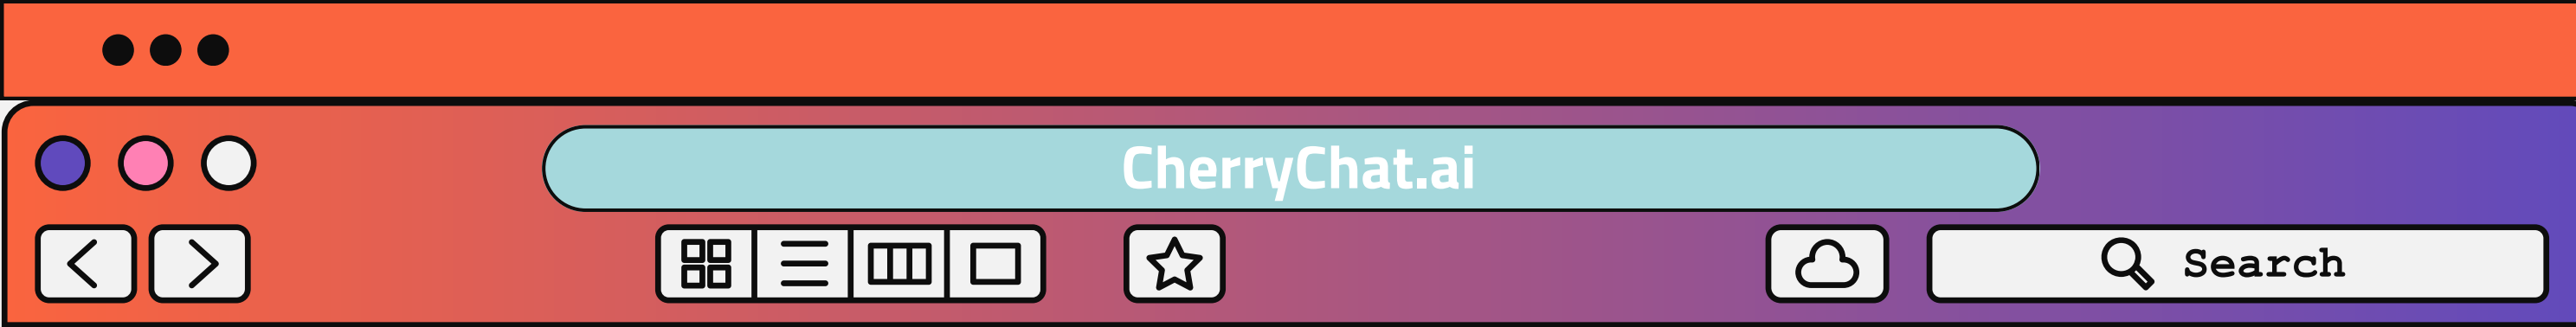

Sri Lanka failed to qualify for the ICC Champions Trophy 2025 because of their performance in the ICC ODI World Cup 2023, where they finished ninth. Only the top eight teams from the World Cup qualified automatically for the Champions Trophy. This marks the first time Sri Lanka will miss an ICC tournament

Our Innovative Solution

CHERRYCHAT.AI	A real-time chatbox where users can discuss and share insights about the website they're browsing and An AI assistant that scans the website and provides instant answers to user queries & The ability to flag and forward select user queries directly to the website owner for immediate action
For Users	Enables seamless, real-time discussions with other visitors. (Example: Shoppers on an e-commerce site can share reviews, product recommendations, or troubleshooting tips.) AI-powered instant answers eliminate the need to search through FAQs or documentation. (Example: "Where can I find the return policy?" → The AI scans and delivers an answer instantly.)
For Website Owners	- Receive direct user feedback via flagged queries, helping them resolve issues faster. - Gain valuable insights into user pain points and needs through chat analytics and sentiment analysis.
Why CherryChat.ai Is Unique	Collaborative + AI-Powered - Combines the power of community discussions with AI-driven insights. Universal Overlay: - Works across all websites without requiring heavy integration.

1. Freemium Model

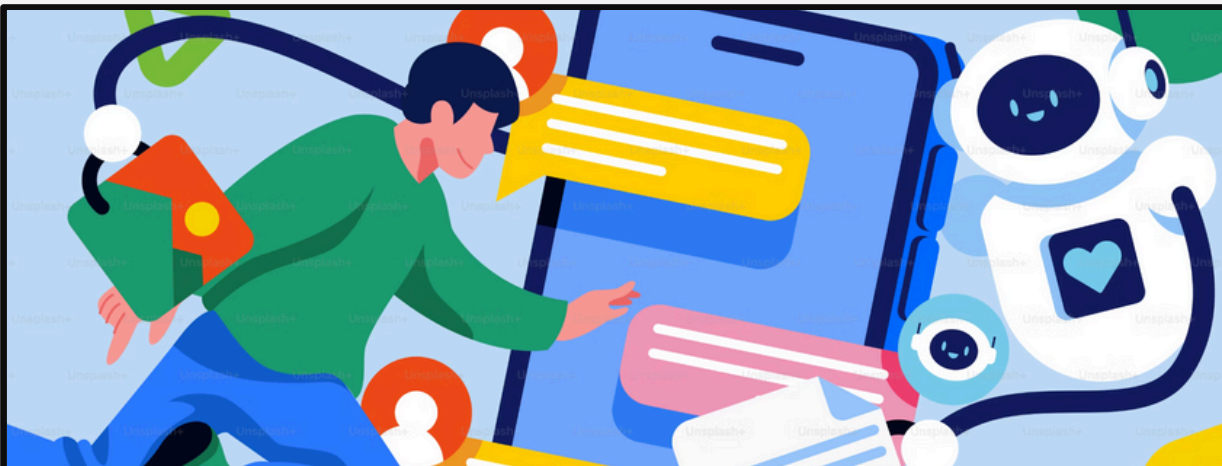

- **Basic Tier (Free):**
 - Individuals who want to discuss and solve problems collaboratively without extra cost.
- **Premium Tier (Subscription):**
 - Targeted at website owners and businesses who want advanced features such as:
 - Analytics Dashboard: Access detailed user insights, chat trends, and customer feedback analysis.
 - AI Customization: Fine-tune the AI to answer business-specific queries more effectively.
 - Branding Options: Customize the chatbox to match their website's design.

2. Subscription Pricing for Website Owners

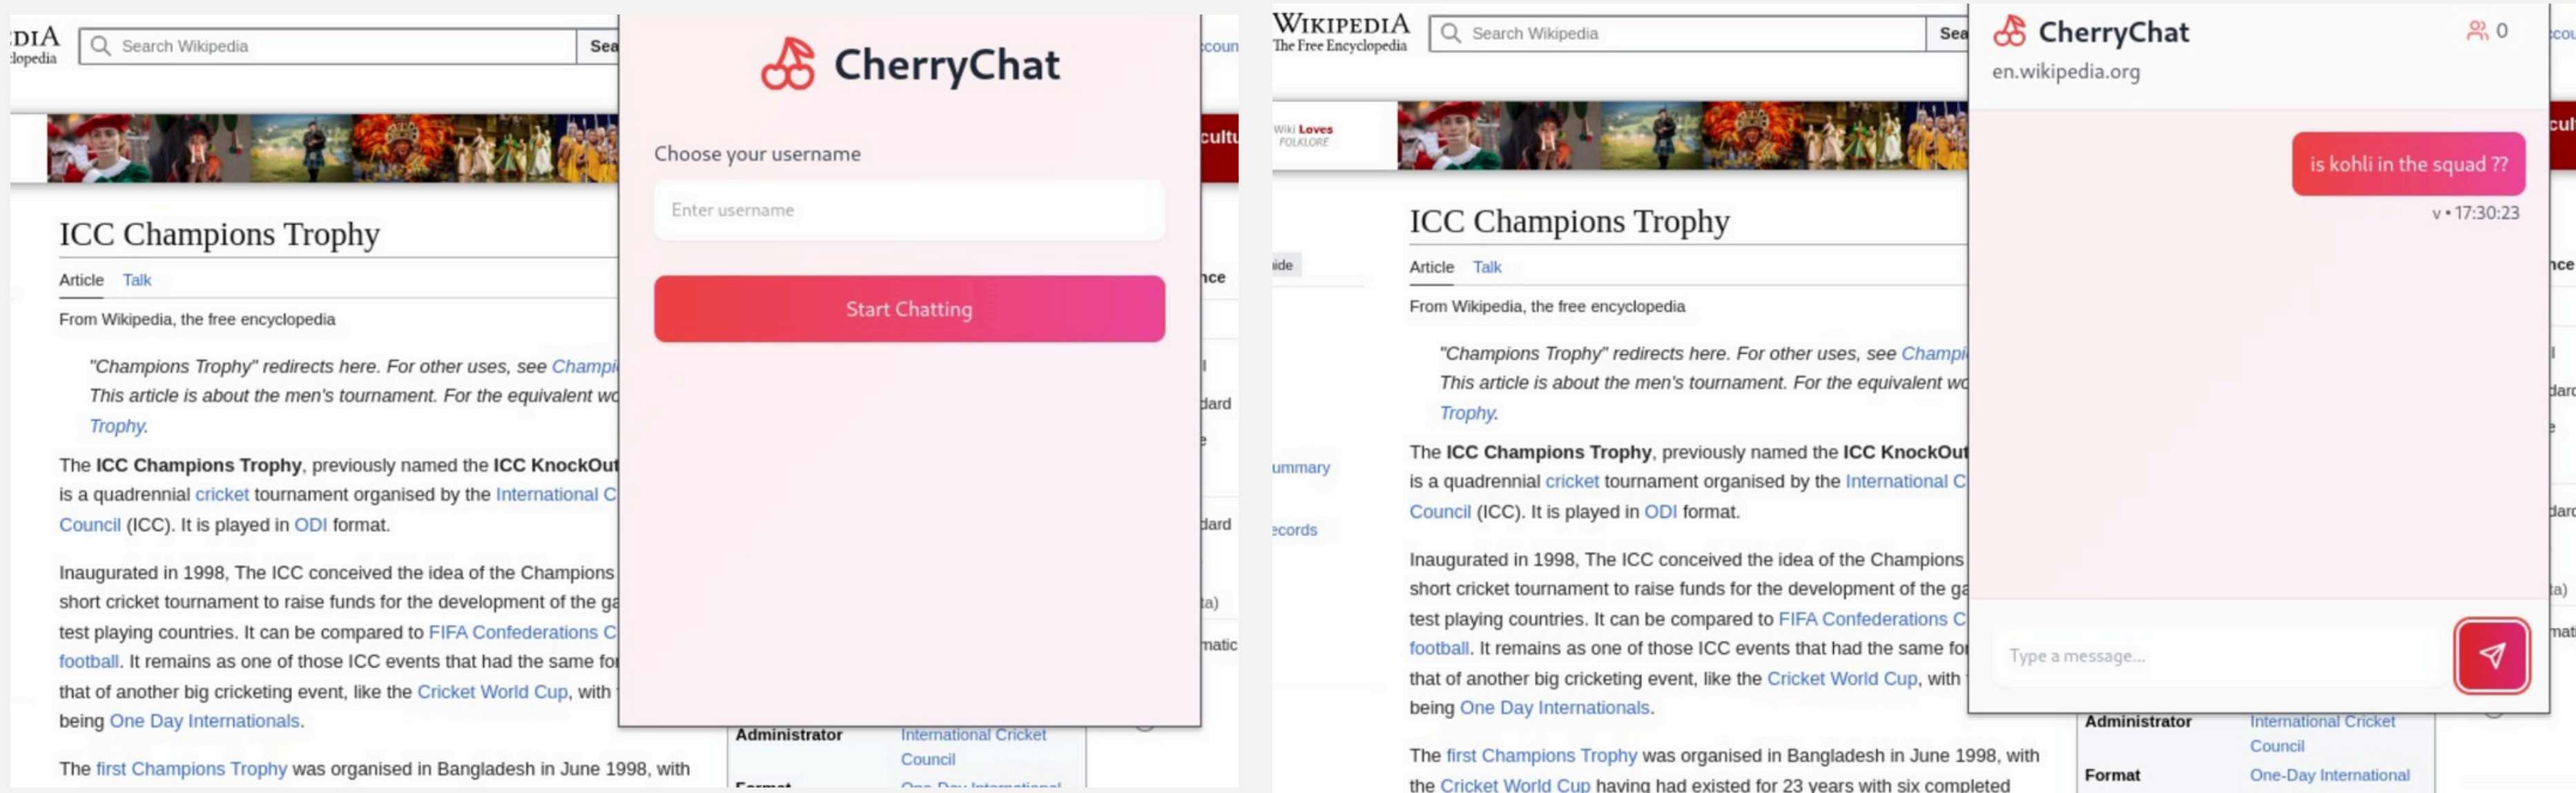

3. Advertising Revenue

- Ads can be integrated into the free version of the chatbox for monetization without disrupting the user experience.

Market Opportunity

Target Users	CherryChat.ai serves a diverse audience, including: • General Internet Users: ○ Individuals browsing e-commerce platforms, job portals, or educational sites who need answers or peer support. • Communities: ○ Hobbyists, learners, or professionals seeking collaborative spaces directly on the websites they visit.
Target Businesses	• E-Commerce Websites: ○ Benefit from instant answers to FAQs, reduced cart abandonment, and peer-driven product discussions. • SaaS Companies: ○ Improve customer onboarding with real-time support and AI-driven issue resolution. • Educational Platforms: ○ Foster peer collaboration among learners while resolving technical or course-related questions. • Government and Public Service Portals: ○ Address user concerns about navigating forms, services, or processes.

Market Opportunity

Market Opportunity	• Growing Internet Usage: ◦ Over 4.9 billion active internet users globally, with increasing reliance on online platforms for shopping, learning, and work. • Rising Demand for AI Tools: ◦ The global AI market is expected to reach \$1.8 trillion by 2030, with a significant share driven by customer support applications. • Community-Driven Solutions: ◦ Users increasingly seek collaborative spaces to connect and share knowledge directly on the platforms they use.
Competitive Landscape	• Existing Solutions Include: ◦ Forums (e.g., Reddit): Decentralized, requiring users to leave the website. ◦ Live Chat Software: One-to-one, limited to customer and support agent interactions. ◦ Static AI Chatbots: Lack peer collaboration and adaptability across multiple sites. • Why CherryChat.ai Stands Out: ◦ Combines real-time community chat with AI-driven answers and insights for website owners. ◦ Works universally across websites with minimal integration.

Market Opportunity

Scalability

- **Geographic Reach:**
 - CherryChat.ai can serve users worldwide, with plans for multilingual AI to break language barriers.
- **Browser Integration:**
 - As a browser extension or script, CherryChat.ai is easy to scale across diverse industries and platforms.
- **Cross-Sector Potential:**
 - From e-commerce to public services, the platform is adaptable to any website where users need help or collaboration.
